

FTL155

WOVEN COTTON BRAKE LINING

FTL155 is one of our non-asbestos friction materials, woven with cotton yarns without wire inserts, impregnated with a special resin.

Has a high friction coefficient, under normal conditions, and is used where working temperatures are not too high. Has an excellent wear rate and maintains its dimensional stability during work.

Is specially recommended for use in the food industry like sugar centrifuges And for equipment where the permissible grade of contamination is limited. Is also used in winches, elevators, washing machines and other applications.

TECHNICAL DATA

Friction coefficient 0.50
Wear rate < 0.0044 in³ / hp.hr.

PHYSICAL PROPERTIES

Specific gravity 0.98 kg / dm³
Maximum recommended temperature
- Intermittent 150 ° C
- Continuous 120 ° C
Maximum load 10.5 da N /cm²

FORMS AND SIZES

Supplied in rolls or cut linings.
Standard roll length: 7.5 m
Thickness: 3mm to 19mm
Width: up to 330mm.
